

# Slatted Wall Panel - A0624

## Installation Instructions

**1**

**To mount the panel, you will need the following:**

- Skill saw / Fine-toothed blade
- Tape measure
- Spirit level
- Black screws
- Pencil
- Drill

For protection, use cotton gloves during installation.

**2**

Decide the direction in which the acoustic panels will be mounted. Panels can be shortened from the back using a skill saw or fine-toothed blade.

**3**

Install the panels with black screws through the polyester into the wall or the ceiling. Screws are strategically positioned left to right at the bottom, middle and top of each panel.
