

Acoustic Panel 300 x 300mm Pyramid

Installation Method 1:

- 1** Unpack the vacuum-compressed package

- 2** Use a hair dryer (Heat mode) to evenly blow over the surface for 2-3 minutes until the foam expands and recovers

- 3** Ventilate the expanded foam for 10 minutes
Heating with a hair dryer will produce a slight odour, this will quickly dissipate after ventilation

- 4** Clean the walls and keep the walls dust-free

- 5** Peel off the backing paper
Do not touch the backing adhesive, this will affect the stickiness

- 6** Stick on the wall, and press the foam evenly

Installation Method 2:

- 1** Unpack the vacuum-compressed package

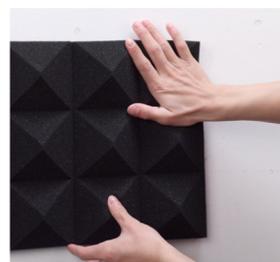

- 2** Wait for about 24-48 hours for foam to return to normal shape

- 3** Clean the walls and keep the walls dust-free

- 4** Peel off the backing paper

- 5** Stick on the wall, and press the foam evenly
