Connection

Please connect the Graphics tablet to the PC USB 2.0/3.0 port
(Don't connect to the front USB port of the PC).

Driver installation

1. After "Connection", Please wait a minute. Then open "My PC" or "MY COMPUTER", find the "Pen Driver" CD-ROM. Open the "Tablet_Setup.exe" file to run the driver installation.

2. Follow the installation wizard step by step to install it.

3. In the last wizard page, if you want to download the 'Paint Tool SAI' software, Please Select it, then click 'Finish'.

4. Select the Download Path to save it.

5. When the download is completed, Open the sai.exe file then follow the wizard to install it.

6. If the following icons appear on the desktop, it indicates that the driver installation is completed.

Light Status

The workspace light will light up when the tip of the pen touches the working area or when the key of the pen is pressed in the induction zone.

Key functions

There are 12 programmable keys on the left and 10 media keys on the top of tablet.

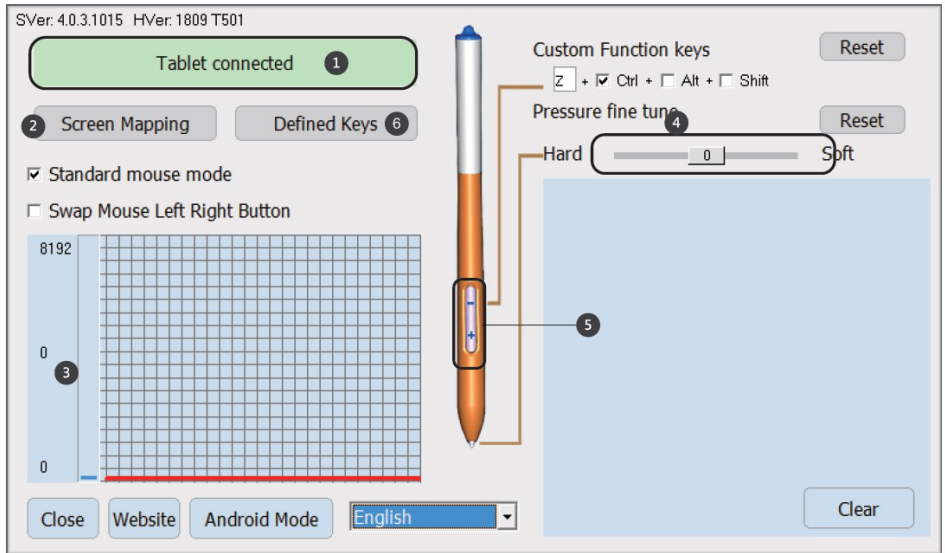

Note

1. Don't use USB HUB or use USB extension cable to connect to PC.
2. If the pen is not used, don't let the pen touch anything and avoid it falling from high places.
3. Please don't use two or more Graphic tablet devices at the same time.
4. In windows 7 system, please turn off flicks.
